

A black and white photograph of a coastal landscape. In the foreground, there's a sandy beach with some small pools of water reflecting the sky. Beyond the beach, there are dark, rugged mountains. The sky is filled with clouds, and the overall atmosphere is somewhat moody and dramatic.

management

In a Nutshell

“Soffid’s Smart Engine, is created to make a direct shortcut from design to production, cutting it from months down to weeks. With its fully automated understanding of identity-cycle logic and virtualized services, the scripting API integrations, in comparison, are now perceived as a long-drawn and non-scalable solution”

Improve user productivity and reduce support costs

Use of smart devices in corporate environments

Increase IT flexibility (mobile & cloud environments)

Increase internal and external IT security

Audit & legal compliance

Reduce risk and dependence of key people

Why **soffid**

Full identity governance features

- Transversal product
- Business Process Manager
- Reporting engine
- Role mining features
- Full audit & compliance

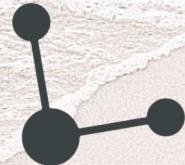

Open Source product

- Source Code to customer
- Full product, license only what you use
- Quick development
- Part of product customization

Full single Sign On experience

- Web Single Sign On
- Enterprise Single Sign On
- Self-service portal
- Two-factor authentication

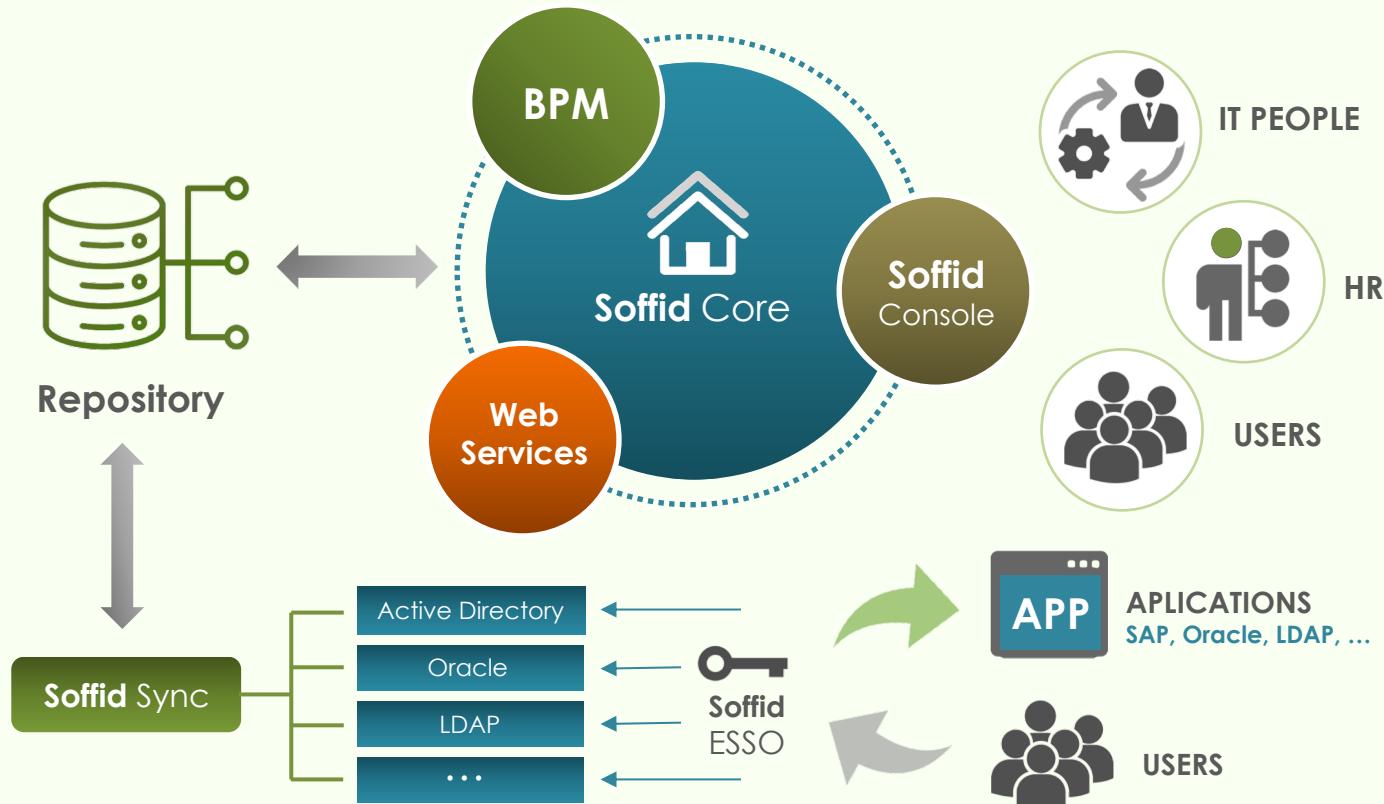

Fast and flexible integrations

- Quick and seamless deployments
- All systems supported
- Easy integration of multi-factor auth.
- Full access to all system data

Competitive advantage

Feature list

The competition

COST	Expensive solutions	No acquisition fee. Maintenance subscription based on required features.
STRUCTURE	Developed as independent software products	Single product with optional modules. End-to-End solution.
CONFIGURATION	Hard Deployment & development	Straightforward configuration
APPROACH	Technical approach	Business focused. Dedicated workflow engine
HIGH AVAILABILITY	Requires additional licenses	No additional licenses required.

Success Histories

Soffid was the only provider that fulfilled 100% of the requirements of the **DirecTV** use case.

- **The proof of concept,**
 - ✓ Was executed with agility, easy configuration and adaptability.
 - ✓ Showed that users were created in the AD target system once the "on-boarding" process started from HR (including additional authorization from the proprietary system based on IBS)
 - ✓ Validated the possibility of creating a flow of approvals, a rules engine, role replication automation and the possibility of exporting to the corporate system of AT&T
- **The best price of support license** (without acquisition cost)
- **Competitive rate of professional services**
- **Bilingual staff** (English - Spanish)

Success Histories

Consum is the sixth largest food retailer in Spain, and represents one of the most successful stories in this context in Spain.

Consum started with a small food store in Alaquas, Valencia, in 1975 and today has more than 15,000 workers.

Since 2016, Consum is using Soffid as its Identity Governance and Access management software, and all its internal processes have benefited from it.

Soffid has increased the productivity of Consum, hence significant amount of time is saved, through prevention of lost or forgotten passwords. Soffid has further improved the security, as well as the access control to corporate applications.

Gartner Award 2017

Gartner report: Options for Open Source Identity and Access Management: 2017 Update

In this report, Gartner analyzes the technological state of the different open source products. It provides a comparison between them, and issues a series of recommendations for the end users.

SOFFID ANALYSIS.

Functionality: (Medium to High). “*Soffid has one of the most comprehensive list of IAM features of products reviewed in this report. It is also the only product, set from one vendor, that includes ESSO and PAM functionality*”.
